

With iPad and Adobe Acrobat Studio, reports are smarter, faster, and field ready.

Turn raw site data into polished, shareable insights.

Reporting delays can stall projects and create bottlenecks in communication. With Adobe tools and iPad, teams can stay informed and agile, turning raw data into actionable insights without waiting for office-based processes. For construction teams, this ensures real-time visibility into progress, compliance, and safety metrics – keeping projects on schedule and within budget.

Acrobat Studio unifies everything you need

Design with Express, manage documents through Document Cloud, and capture approvals with Adobe Sign, all on iPad. A single subscription delivers multiple solutions, making it simple for customers to see the value.

Key features

Quick Visual Reports: Use Adobe Express to design charts, infographics, and photo layouts on the go.

In-Document Markups: Annotate PDF reports in Acrobat – highlight trends, draw notes, and comment with colleagues.

Signature & Distribution: Secure approvals and finalise reports using Adobe Sign from within Acrobat.

iPad Advantages

Powerful Performance: Handles heavy assets with M3 or A16 iPads and 6-8GB RAM.

Stunning Display: Clear rendering of visuals and annotations on Liquid Retina or OLED screens.

Seamless Input: Annotate and sign with Apple Pencil, finger or stylus.

Benefits at a Glance

- Build professional visual reports anywhere.
- Annotate, revise, and approve in real time.
- Deliver polished, signed documents instantly.

Equip your team: install Adobe Express, Acrobat, and Adobe Sign on iPad and elevate your reporting workflows.
