

Annotate, sign, and share in seconds – right from the field.

With iPad and Adobe Acrobat Studio, site plans become dynamic, collaborative, and mobile ready. Annotate, sign, and share in seconds.

Transform paper blueprints into interactive, on-site visuals.

Traditional paper plans often slow down collaboration and make it harder to keep everyone aligned. By moving to digital workflows, teams can accelerate decision-making, reduce errors, and ensure that updates are shared instantly across the project. In the construction field, this means faster approvals, clearer communication, and fewer costly mistakes on-site.

Acrobat Studio brings everything together

Create with Express, manage documents with Document Cloud, and capture approvals with Adobe Sign, all on iPad. One subscription, multiple cases, simplifying the story and making it easier for customers to understand the value.

Key features

Create Visual Summaries: Use Adobe Express on iPad to create branded visual maps and overlays.

Markup and Annotation: Open site plans in Adobe Acrobat Mobile to mark up drawings, highlight changes, and draw directly with the Apple Pencil.

Capture Approvals Instantly: Secure signatures with Adobe Sign – no printing, scanning or delays.

Benefits at a Glance

- Convert paper plans into interactive PDFs instantly.
- Resolve site issues via mobile annotation.
- Streamline approvals and collaboration in real time.
- Reduce turnaround time for approvals.

iPad Advantages

Performance: M3 or A16 chip handles large PDFs and multitasking.

Precision: Apple Pencil for accurate markups.

Portability: Light weight design for on-site use.

Display: Liquid Retina clarity for detailed drawing.

Download Adobe Express, Acrobat, and Sign on your iPad today to bring site planning into the field.
