Creating Your GTM Message

Based on the solution information determined in lesson 3, Microsoft 365 E5 provides the required feature set to meet the needs of this industry. Now that we understand our solution requirements, we can define our go-to-market message.

What Is the Information Provided?

- Presenting Our Solution with a Strategic Go-To-Market message
- Do You Believe The GTM Statement Achieves Its Purpose?

Why Is This Information Important to Understand and Use?

In customer interactions, it is essential to address their concerns within the context of their specific industry, as these are typically the most crucial to meeting their needs. Successfully meeting this brief is crucial for boosting your chances of winning the customer's trust and business.

Presenting Our Solution with a Strategic Go-To-Market Message

Ask Copilot

Create a strategic, go-to-market message based, providing an overview, the top 5 security priorities and provide 4 key benefits of Microsoft 365 for the Insurance industry, specifically for the Australian and New Zealand markets. Provide a compelling reason to act at the end. Present everything in clear speak, not using technical terms. Replace any references to Microsoft 365 or Microsoft 365 E5 with {Insert your solution name}.

{Insert Business Name}: Empowering the Australian and New Zealand Insurance Industry

The Insurance industry in Australia and New Zealand are undergoing significant transformations, driven by technological advancements and evolving customer expectations. In this dynamic landscape, staying ahead of the curve demands the adoption of robust and innovative solutions. {Insert your solution name} is designed to not only meet but exceed the security and operational needs of insurance companies, ensuring they remain competitive, secure, and trusted by their clients.

Top 5 Security Priorities

- **Data Protection:** Ensuring the confidentiality and integrity of customer data is paramount. {Insert your solution name} provides comprehensive data encryption and secure storage.
- **Threat Detection:** Early identification and mitigation of potential threats can prevent significant breaches. Our solution offers advanced threat monitoring and real-time alerts.
- **Compliance:** Staying compliant with regulatory requirements is essential. {Insert your solution name} helps insurance companies adhere to industry standards and regulations effortlessly.
- **Access Control:** Managing who has access to what information is crucial. Our solution features robust access control mechanisms to ensure that only authorised personnel can access sensitive data.
- **Incident Response:** Quick and effective response to security incidents minimises damage. {Insert your solution name} includes tools for efficient incident management and response.

Key Benefits For Australian Government Agencies

- **Enhanced Security:** With top-tier security features, {Insert your solution name} ensures your business is protected against the latest threats.
- **Improved Efficiency:** Streamline operations with our intuitive and user-friendly interface, allowing your team to focus on what they do best.
- **Regulatory Compliance:** Easily meet compliance requirements and avoid potential fines with our built-in compliance solutions.
- **Customer Trust:** Build and maintain trust with your clients by demonstrating a strong commitment to security and data protection.

The Time To Act Is Now

The insurance industry is rapidly evolving, and staying ahead means adopting the best tools available. {Insert your solution name} not only meets but exceeds the security and operational needs of Australian and New Zealand insurance companies. By implementing our solution, you can ensure your business remains competitive, secure, and trusted by your clients.

Do not wait—take the first step towards a more secure and efficient future today.

Do You Believe The GTM Statement Achieves Its Purpose?

While we are using Copilot to build the statement, vastly speeding up the creation process, we still need to ensure the statement is listing the relevant information, ensuring we simply need to tweak the message, rather than having to create it entirely from scratch. After reading it, ask yourself the following:

- Does the request provide a clear message at the start and the end of the statement?
- Are the top 5 priorities listed, similar / same as discovered in lesson 2 for Insurance?
- Are the benefits listed highlight how the customer will see improvements in the day-to-day operations?
- Do you think the 'take action now' statement will resonate with these customers?

If you feel that the statement is not right, go back and massage the request and re-present it until you are happier with it. If you feel the bulk of the statement is suitable, but what to rewrite specifics part, Copilot can do this for you very quickly.

While perfection is not necessary, the content must highlight the key security priorities to effectively resonate with the intended reader.
